

JANUARY 31, 2019

FUND OVERVIEW

Northeast Investors Trust is one of the oldest bond mutual funds in the country, run by the longest-tenured fixed income management team in the industry. Our no-load, fixed income fund invests primarily in domestic high-yield debt, with a buy-and-hold mindset. But unlike some high yield funds and ETF's that are tethered to a rigid benchmark, Northeast Investors Trust has the freedom to invest in sectors and securities in which its managers have the most conviction, regardless of bond ratings or maturities. Our managers can also invest a portion of the fund in other types of debt, preferred securities, common stock, and convertible securities.

Past Performance does not guarantee future results, and an investment in the Trust is not guaranteed. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than that quoted. Additional Performance data may be obtained by calling 1-800-225-6704 or by visiting <http://northeastinvestors.com/fund/performance-information>

The ICE BofA Merrill Lynch US High Yield Index is an unmanaged market value-weighted index comprised of approximately 2,200 domestic and yankee high yield bonds, including deferred interest bonds and payment-in-kind securities. Issues included in the index have maturities of one year or more and have a credit rating lower than BBB-/Baa3, but are not in default.

*The inception date for the Trust is 3/1/1950; the inception date for the ICE BofA Merrill Lynch US High Yield Index is 8/31/1986.

Investors should carefully consider investment objectives, risks, charges and expenses. This and other important information about the Trust is contained in the prospectus or summary prospectus, either of which may be obtained by calling 1-800-225-6704 or by visiting www.northeastinvestors.com. Please read either one carefully before investing.

Mutual Fund investing involves risk. The Trust invests in lower rated debt securities which may be subject to increased market volatility based on factors such as: the ability of an issuer to make current interest payments, the potential for principal loss if an issuer declares bankruptcy, and the potential difficulty in disposing of certain securities in a timely manner at a desired price and therefore can present an increased risk of investment loss.
